SUPPLEMENT NO. 1

BIBLIOGRAPHY ON VESICULAR STOMATITIS

1964 - 1967

Compiled by

(Mr.) Bela Balassa

Librarian

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL RESEARCH SERVICE
ANIMAL DISEASE AND PARASITE RESEARCH DIVISION
PLUM ISLAND ANIMAL DISEASE LABORATORY
POST OFFICE BOX 848
GREENPORT, LONG ISLAND, NEW YORK 11944

INTRODUCTION

This bibliography is the first supplement to the Bibliography on Vesicular Stomatitis, 1826 - 1963", published in December, 1963. References have been selected from the world literature available in the collection of the Plum Island Animal Disease Laboratory library for the period 1964-1967. A few references, prior to 1964, have been added since they were not included in the original bibliography.

January, 1968

B. Balassa
Librarian

VESICULAR STOMATITIS

A Bibliography

1968 - September, 1971

Compiled By

Robert Uskavitch, Librarian

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL RESEARCH SERVICE
VETERINARY SCIENCES RESEARCH DIVISION
PLUM ISLAND ANIMAL DISEASE LABORATORY
POST OFFICE BOX 848
GREENPORT, LONG ISLAND, NEW YORK 11944

INTRODUCTION

This bibliography is the second supplement to "Bibliography of Vesicular Stomatitis", compiled by B. Belassa. References have been selected from the world literature available in the collection of the Plum Island Animal Disease Laboratory Library for the period of 1968 - September, 1971. A few references, prior to this period have been added since they were not included in the original bibliography and the first supplement.

It should be noted that in many instances vesicular stomatitis virus is used as a challenge in interferon titrations. The references may serve a dual purpose for those interested in interferon studies.

SUPPLEMENT NO. 3

VESICULAR STOMATITIS VIRUS

A Bibliography

OCTOBER 1971 - SEPTEMBER 1972

Compiled by:

Robert Uskavitch
Librarian

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL RESEARCH SERVICE
PLUM ISLAND ANIMAL DISEASE LABORATORY
POST OFFICE BOX 848
GREENPORT, LONG ISLAND, NEW YORK 11944

INTRODUCTION

This bibliography is the third supplement to "Bibliography of Vesicular Stomatitis", compiled by Bela Balassa. References have been selected from the literature acquired by the Plum Island Animal Disease Laboratory-Library for the period October 1971 - September 1972.

These references are not meant to be definitive, but are a starting point for a more extensive review of the pertinent literature on vesicular stomatitis virus. Since this virus is used as a challenge in interferon titration, the references may serve a dual purpose.

Robert Uskavitch
Librarian

September 1972

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. This section also outlines the various methods used to collect and analyze data, ensuring that the information is reliable and up-to-date.

2. The second part of the document focuses on the financial aspects of the organization. It provides a detailed breakdown of the budget, including income, expenses, and the resulting surplus or deficit. This section also discusses the various financial risks faced by the organization and the strategies implemented to mitigate these risks. The goal is to ensure that the organization remains financially sound and sustainable in the long term.

3. The third part of the document addresses the operational aspects of the organization. It describes the various processes and procedures that are in place to ensure the efficient and effective delivery of services. This section also discusses the various challenges faced by the organization in terms of resource allocation, personnel management, and the overall quality of service. The goal is to identify areas for improvement and implement changes that will enhance the organization's operational performance.

4. The fourth part of the document discusses the legal and regulatory aspects of the organization. It outlines the various laws and regulations that apply to the organization's operations and the steps taken to ensure compliance. This section also discusses the various legal risks faced by the organization and the strategies implemented to minimize these risks. The goal is to ensure that the organization operates within the law and is protected from legal liabilities.

5. The fifth part of the document discusses the social and environmental aspects of the organization. It outlines the various social and environmental issues that the organization is involved in and the steps taken to address these issues. This section also discusses the various risks faced by the organization in terms of social and environmental factors and the strategies implemented to manage these risks. The goal is to ensure that the organization is socially and environmentally responsible and contributes positively to the community and the environment.

INTRODUCTION

This bibliography is the fourth supplement to "Bibliography of Vesicular Stomatitis", compiled by Bela Balassa. References have been selected from the literature acquired by the Plum Island Animal Disease Center-Library for the period October 1972 - September 1973.

As stated in the previous supplements, these references are not meant to be definitive, but are a starting point for a more extensive review of the pertinent literature on vesicular stomatitis virus.

Also, this particular virus is used as a challenge with interferon titration. The references may be useful for interferon research.

Robert Uskavitch
Librarian

September 1973

The first part of the report is devoted to a description of the general situation in the country. It is found that the country is in a state of general depression, and that the population is suffering from want and distress. The cause of this is attributed to the war, and the consequent destruction of property and the loss of life.

The second part of the report is devoted to a description of the state of the country. It is found that the country is in a state of general depression, and that the population is suffering from want and distress. The cause of this is attributed to the war, and the consequent destruction of property and the loss of life.

The third part of the report is devoted to a description of the state of the country. It is found that the country is in a state of general depression, and that the population is suffering from want and distress. The cause of this is attributed to the war, and the consequent destruction of property and the loss of life.

Yours faithfully,

W. H. H. H.

Bull. Acad. Vet. Fr. 46 (3): 129-133.
- Kahrs, R. F. 1971.
Differential diagnosis of bovine viral diarrhea-mucosal disease.
J. Am. Vet. Med. Assoc. 159 (11): 1383-1386.
- Kalter, S. S. 1960.
Animal "orphan" enteroviruses.
Bull. WHO 22 (3-4): 319-337.
- Kanady, M. J., and Smith, W. R. 1972.
Variations in the interferogenic responses of two strains of mice.
Proc. Soc. Exp. Biol. Med. 141 (3): 794-797.
- Kano, S., Bloom, B. R., and Howe, M. 1973.
Enumeration of activated and cytotoxic T-lymphocytes by the virus
plaque assay.
Fed. Proc. 32 (3, Part 1): 997 Abs (4381).
- Kano, S., Bloom, B. R., and Howe, M. L. 1973.
Enumeration of activated thymus-derived lymphocytes by the virus
plaque assay.
Proc. Natl. Acad. Sci. U.S.A. 70 (8): 2299-2303.
- Kates, J. R., Radke, K. L., and Colby, C. 1973.
Requirement for the cell nucleus in the interferon-induced antiviral
state.
Abstr. Annu. Meet. Am. Soc. Microbiol. 73: 239 (V267).
- Kaverin, N. V., Varich, N. L., and Smirnov, Y. A. 1973.
Sedimentational pattern of virus-specific RNA synthesized in Newcastle
disease virus-infected cells treated with amino acid analogues.
Arch. Gesamte Virusforsch. 41 (3): 191-198.
- Kawade, Y. 1973.
Purification and characterization of mouse L cell interferon. I.
Preliminary studies.
Jap. J. Microbiol. 17 (2): 129-140.
- Kawade, Y., and others. 1972.
Antagonism of non-inducer ribonucleic acid against induction of
antiviral cell resistance and interferon by inducer ribonucleic acid.
Jap. J. Microbiol. 16 (6): 501-513.
- Kelley, J. M., Emerson, S. U., and Wagner, R. R. 1972.
The glycoprotein of vesicular stomatitis virus is the antigen that
gives rise to and reacts with neutralizing antibody.
J. Virol. 10 (6): 1231-1235.
- Kendal, A. P., Kiley, M. P., and Eckert, E. A. 1973.
Isoelectric focusing studies of A₂/1957 influenza neuraminidase and its
subunits
Biochim. Biophys. Acta 317 (1): 28-33.

In: Vet. Pathol., by H. A. Smith and others. 4th ed. Philadelphia, Lea & Febiger.

Smith, J. L., and others. 1973.

Persistent rubella virus production in embryonic rabbit chondrocyte cell cultures.

Proc. Soc. Exp. Biol. Med. 143 (4): 1037-1041.

The first part of the report is devoted to a description of the general situation in the country. It is found that the country is in a state of general depression, and that the population is suffering from want and distress.

The second part of the report is devoted to a description of the state of the finances of the country. It is found that the country is in a state of financial ruin, and that the government is unable to meet its obligations.

The third part of the report is devoted to a description of the state of the education of the country. It is found that the country is in a state of general ignorance, and that the population is unable to read or write.

The fourth part of the report is devoted to a description of the state of the health of the country. It is found that the country is in a state of general sickness, and that the population is suffering from various diseases.

The fifth part of the report is devoted to a description of the state of the agriculture of the country. It is found that the country is in a state of general poverty, and that the population is unable to produce enough food to sustain itself.

The sixth part of the report is devoted to a description of the state of the commerce of the country. It is found that the country is in a state of general stagnation, and that the population is unable to trade with other countries.

The seventh part of the report is devoted to a description of the state of the industry of the country. It is found that the country is in a state of general decay, and that the population is unable to produce any goods.

The eighth part of the report is devoted to a description of the state of the arts of the country. It is found that the country is in a state of general ignorance, and that the population is unable to create any works of art.

The ninth part of the report is devoted to a description of the state of the sciences of the country. It is found that the country is in a state of general ignorance, and that the population is unable to understand any scientific principles.

The tenth part of the report is devoted to a description of the state of the religion of the country. It is found that the country is in a state of general superstition, and that the population is unable to understand any religious principles.

The eleventh part of the report is devoted to a description of the state of the government of the country. It is found that the country is in a state of general corruption, and that the government is unable to govern itself.

The twelfth part of the report is devoted to a description of the state of the future of the country. It is found that the country is in a state of general hopelessness, and that the population is unable to see any future for itself.

Cellular alteration by interferon: a virus-free system for assaying interferon.
J. Virol. 10 (5): 896-901.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud.

2. The second part of the document outlines the specific procedures for recording transactions. It details the steps involved in the accounting cycle, from identifying the transaction to posting it to the appropriate ledger account.

3. The third part of the document discusses the role of the auditor in verifying the accuracy of the records. It describes the various audit techniques used to test the reliability of the accounting system and to ensure that the financial statements are presented fairly.

4. The fourth part of the document addresses the issue of internal controls. It explains how a well-designed system of internal controls can help to minimize the risk of error and to ensure that the organization's assets are protected.

5. The fifth part of the document discusses the importance of transparency and accountability in financial reporting. It stresses that organizations should provide clear and concise information about their financial performance to all stakeholders.

6. The sixth part of the document discusses the role of the board of directors in overseeing the financial reporting process. It explains that the board is responsible for ensuring that the financial statements are prepared in accordance with applicable accounting standards and that they are free from material misstatement.

7. The seventh part of the document discusses the importance of ongoing monitoring and evaluation of the financial reporting system. It explains that organizations should regularly review their internal controls and accounting procedures to ensure that they remain effective and up-to-date.

8. The eighth part of the document discusses the role of the external auditor in providing an independent opinion on the financial statements. It explains that the external auditor is responsible for conducting a thorough examination of the financial records and for reporting on the results of their audit.

9. The ninth part of the document discusses the importance of communication and collaboration between all parties involved in the financial reporting process. It stresses that effective communication is essential for ensuring that everyone is working towards the same goals and that any issues are identified and resolved promptly.

10. The tenth part of the document discusses the importance of staying up-to-date on changes in accounting standards and regulations. It explains that organizations must adapt to new requirements in order to maintain the accuracy and reliability of their financial reporting.

INTRODUCTION

This bibliography is the fifth supplement to "Bibliography on Vesicular Stomatitis." References have been selected from the literature acquired by the Plum Island Animal Disease Center - Library for the period of October 1973 - September 1974.

These references are not meant to be definitive but may serve as an introduction to relevant literature on vesicular stomatitis virus.

Robert Uskavitch
Librarian

September 1974

INTRODUCTION

This bibliography is a fifth supplement to the bibliography on Vesicular Stomatitis. References have been selected from the literature published in the U.S.A. and U.S.S.R. between 1960 and 1964 for the period of October 1960 to September 1964. These references are not meant to be a selection of relevant literature on vesicular stomatitis. They are a selection of relevant literature on vesicular stomatitis.

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the problem and the objectives of the research.

2. The second part of the report is a detailed description of the methods used in the study. It includes a discussion of the experimental design, the subjects, and the procedures.

3. The third part of the report is a presentation of the results of the study. It includes a discussion of the data and the conclusions drawn from the analysis.

4. The fourth part of the report is a discussion of the implications of the findings. It includes a discussion of the theoretical and practical significance of the results.

5. The fifth part of the report is a conclusion. It summarizes the main findings of the study and provides a final statement on the importance of the research.

6. The sixth part of the report is a list of references. It includes a list of the books, articles, and other sources used in the study.

7. The seventh part of the report is an appendix. It includes a list of the tables, figures, and other materials that are included in the report.

8. The eighth part of the report is a list of the names of the people who were involved in the study. It includes the names of the principal investigator, the co-investigators, and the research assistants.

9. The ninth part of the report is a list of the names of the people who were consulted during the study. It includes the names of the members of the advisory committee, the members of the ethics committee, and the members of the review board.

10. The tenth part of the report is a list of the names of the people who were interviewed during the study. It includes the names of the participants, the members of the advisory committee, and the members of the ethics committee.

11. The eleventh part of the report is a list of the names of the people who were interviewed during the study. It includes the names of the participants, the members of the advisory committee, and the members of the ethics committee.

12. The twelfth part of the report is a list of the names of the people who were interviewed during the study. It includes the names of the participants, the members of the advisory committee, and the members of the ethics committee.

INTRODUCTION

This bibliography is the sixth supplement to "Bibliography on Vesicular Stomatitis." References have been selected from the literature acquired by the Plum Island Animal Disease Center - Library for the period of October 1974 - September 1975.

These references are not meant to be definitive but may serve as an introduction to relevant literature on vesicular stomatitis virus.

Robert Uskavitch
Librarian

September 1975

1900

1. The first step in the process of identifying a potential threat is to determine the nature of the threat. This can be done by reviewing the threat's history, its current status, and its potential impact on the organization. Once the nature of the threat has been identified, the next step is to assess the threat's risk. This involves evaluating the likelihood of the threat occurring and the potential consequences if it does. Finally, the third step is to develop a response plan. This plan should outline the steps that will be taken to prevent the threat from occurring, to detect it if it does occur, and to respond to it if it does occur.

1. The first of these is the fact that the

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the South (CLPS) in the United States. The Commission is therefore unable to determine whether the CLPS is a legitimate organization or a subversive group.

1975. Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. (20540-2000).

(X) Vice President, National Association of Manufacturers, Inc., New York City, New York, U.S.A.

1. The following information is being furnished to you for your information only. It is not to be used for any other purpose.

tt, R., and others.

1975. Changes in the surface of the host cell after infection with enveloped viruses. In: Negat. Strand viruses, v.2:843-857, ed. by B. W. J. Mahy and R. D. Barry. New York, Academic Press, 928 p.

Rytel, M. W.

1975. Antagonism of interferon action by mouse tissue extracts and serum. Brief report. Arch. Virol. 48(1):103-106.

Schellekens, H., Huffmeyer, J. H. P. M., and Van Griensven, L. J. L. D.

1975. The influence of emetine on the induction of interferon by poly-I :poly-C in Swiss mice. J. Gen. Virol. 26(2):197-200.

Schloemer, R. H.

1975. Lipophilic tail of the membrane glycoprotein of vesicular stomatitis virus (VSV). Abstr. Annu. Meet. Am. Soc. Microbiol. 75: 238(S149).

Schloemer, R. H., and Wagner, R. R.

1975. Association of vesicular stomatitis virus glycoprotein with virion membrane characterization of the lipophilic tail fragment. J. Virol. 16(2):237-249.

Schloemer, R. H., and Wagner, R. R.

1975. Cellular adsorption function of the sialoglycoprotein of vesicular stomatitis virus and its neuraminic acid. J. Virol. 15(4):882-893.

Schloemer, R. H., and Wagner, R. R.

1975. Mosquito cells infected with vesicular stomatitis virus yield unsialylated virions of low infectivity. J. Virol. 15(4):1029-1032.

Schnitzlein, W. M., and Reichmann, M. E.

1975. Homotypic and heterotypic interference by defective T particles of vesicular stomatitis virus (Indiana). Abstr. Annu. Meet. Am. Soc. Microbiol. 75:263(S300).

Scholtissek, C., and others.

1975. Influence of sugar derivatives on glycoprotein synthesis of enveloped viruses. In: Negat. Strand Viruses, v.2:669-683, ed. by B. W. J. Mahy and R. D. Barry. New York, Academic Press, 928 p.

Shatkin, A. J.

1974. Animal RNA viruses: genome structure and function. In: Annu. Rev. Biochem. v.43:643-665, ed. by E. Snell. Palo Alto, Calif., Annual Reviews, 1085 p.

Shu, H. L.

1974. Interfering and interferon-inducing capacity of NDV. I. Quantitative analysis and physico-chemical characteristics. Arch. Gesamte Virusforsch. 46(3-4):179-190.

Siegel, B. V.

1975. Enhancement of interferon production by poly(rI).poly(rC) in mouse cell cultures by ascorbic acid. Nature (Lond.) 254(5500):531-532.

1. The first part of the report deals with the general situation of the country and the results of the survey.

2. The second part of the report deals with the results of the survey in the different regions of the country.

3. The third part of the report deals with the results of the survey in the different districts of the country.

4. The fourth part of the report deals with the results of the survey in the different provinces of the country.

5. The fifth part of the report deals with the results of the survey in the different counties of the country.

6. The sixth part of the report deals with the results of the survey in the different parishes of the country.

7. The seventh part of the report deals with the results of the survey in the different manors of the country.

8. The eighth part of the report deals with the results of the survey in the different lordships of the country.

9. The ninth part of the report deals with the results of the survey in the different tithings of the country.

10. The tenth part of the report deals with the results of the survey in the different hamlets of the country.

11. The eleventh part of the report deals with the results of the survey in the different villages of the country.

12. The twelfth part of the report deals with the results of the survey in the different towns of the country.
